CPR E 185
Cr. (3)

Introduction to Computer Engineering. Project based examples from computer engineering. Individual interactive skills for small and large groups. Computer-based projects. Solving engineering problems and presenting solutions through technical reports. Solution of engineering problems using a programming language.

Prereq: MATH 143 or satisfactory scores on mathematics placement examinations; credit or enrollment in MATH 165

Classes made available: CPR E 186

Purpose of screen: To display course information in a specified format. When someone touches a class description, this is what they should see. This is all the information you could find by googling "Iowa state "insert major" courses". Plus our addition: Classes made available.

1-4) All simple class information. Everything a student would want to know about the course.

5) Our addition to course information. We thought it would be very helpful if students could figure out what classes open up to them once they've taken a class.
